

GETZINGER SASCHA

Developer & Financial Enthusiast

ABOUT ME

"There are no problems, only solutions nobody thought about before."

Experienced in the world of new technologies and Coding. Pursuing my education in Engineering. When it comes to my passion, it is all about finance.

Interconnecting between different areas and thinking out of the box, when it comes to problems or challenges, it is one of my strongest abilities.

If there is something I could not solve, it would not be a problem anymore when I gain the knowledge in an autodidact way.
